Shul member & friend Bill Fine is ill and home alone. Visitors will be appreciated w/call in advance.

Melissa & Steve Latrell thank everyone for their acts of chesed last week!

Mazel Tov to the Barshishat/Silverbergs on the birth of their new daughter!

Rashi, at the beginning of his famous commentary on the Torah, implies that the commandments are the most important part of the Five Books of Moses. Indeed, the Kabbalists say that the commands are like the body of Torah, and Kabbalah is the soul. Practically speaking, we can't ignore the body, and they are still the bottom line. We are bound to the commandments. This week's Torah portion, called Mishpatim, means "laws." It is filled with commandments and therefore possibly warrants more in-depth study than other sections. And if, through your study, you can get to the inner dimension of these laws, you will find a world of wisdom. What is a commandment? The simple definition is easy. A request is not a command, and does not usually imply consequences. Nor is it necessary for the requester to be in a position of power or authority. That's the difference between a request and a command. Authority and consequences. In the military, a command implies a threat or a punishment. But in the Torah, the consequences are more like a natural outcome. If you tell a child not to dare touch a lit candle or they will get burned, the burn is a natural consequence, not a punishment. Similarly, the commandments from G-d are more like instructions with natural consequences, which is why the Torah is sometimes referred to as "Instructions for Living." Rabbi Moshe Chaim Luzzatto (18th century Italy) describes a spiritual way of looking at the commandments. He says they are pipelines to Heaven. They are our way of turning toward the Infinite, and seeking closeness to Him. G-d established the commandments as the means to become attached to Him. Others describe the commandments as being our spiritual anatomy. Inside us we have 613 spiritual parts that connect to 613 physical parts. These are affected by how well we perform the 613 commandments. We see from here that it's not merely the physical performance of the acts stated in the Torah, because many of the commandments are not for everyone. Some are only for a kohen, some are only for those living in Israel, etc. It must be that there is a principle behind each and every command that anyone can access and do.

By: Rabbi Max Weinman
